

## Acid Piping

Application: Lines Carrying 78% sulfuric acid and hydrochloric acid used for the production of chemicals for the plating and catalyst industries

Location: Palm International LaVergne, Tennessee

Product: Z-Core® pipe and fittings

Features & Benefits: The Z-Core piping system has a broad range of corrosion resistance to handle severe solvent and acid applications. This allows for piping standardization throughout a plant. Product rated for 150 psi at temperatures up to 275° F. Pipe and a full line of fittings are available in 1½"-12" diameters.
