

Industrial Waste Piping

Application: Industrial wastes containing sulfuric, chromic, nitric and hydrofluoric acids, ambient to 150°F temperatures, 35-40 psi pressures

Location: Chase Brass & Copper Company - Waterbury, Connecticut

Product: Over 8,000 ft. of Green Thread® epoxy resin pipe and Poly Thread® om 2"-4" diameters

Features & Benefits: Corrosion resistant fiberglass pipe is able to handle acid waste. The installed cost of fiberglass pipe is less than for stainless steel.

Fiberglass pipe is lightweight and easy to tie into existing fiberglass tanks making for fast, easy installation.
