

## ***Water Main Relining***

**Application:** Relining of a wrought iron water main lying between Mackworth and Great Diamond Islands off Portland Harbor.

**Location:** Portland Water District - Portland, Maine

**Product:** 7,124 feet of 8" Red Thread® pipe was pre-assembled into seven 1,000 foot sections and inserted into the water line.

**Features & Benefits:** Inserting the fiberglass piping into the existing water main rather than replacing the iron piping saved several hundred thousand dollars.

The lightweight, high strength, and abrasion resistance of the fiberglass pipe made for an easy installation.
