

## Sludge and Wastewater Pipe

**Application:** Carries primary, degrittied, digested, and activated sludge. Transports and re-circulates, wastewater between various clarifying tanks and other treatment apparatus. Large portions of the lines were installed in underground tunnels.

**Location:** Ina Road Water Pollution Control Plant - Pima County (Tucson), Arizona

**Product:** Over 16,000 feet of Green Thread®, Big Thread®, and Poly Thread® piping

**Features & Benefits:** The corrosion resistance of fiberglass pipe offers lower maintenance and longer service life. The lighter weight of fiberglass piping vs. steel and concrete piping made the installation quicker and easier.

The flow characteristics were similar to glass-lined steel pipe. The pipe could be steam cleaned periodically to prevent clogging.
