

Turbine Cooling Water & Air Conditioning Piping

Application: One System Carries cooling water to large turbine pumps. The second system uses piping to air condition to turbine building

Location: Jollyville Pump Station City of Austin, Tx

Product: 3"-6" Red Thread® II pipe and fittings

Features & Benefits: The large smooth I.D. of the fiberglass pipe has less friction loss than steel pipe, saving horsepower and energy costs. Ease of installation and lightweight in the tight space resulted in lower installed costs. The adhesive bonded joints proved to be highly reliable and did not require the use of welding equipment in a tight construction area.
