

Chemical Process Lines

Application: Various process chemical transport lines

Location: Pasadena, Texas

Product: Centricast® CL and Z-Core® Pipe and Fittings

Features & Benefits: Approximately 3,500 feet of vinyl ester CL pipe was used for this installation as the piping provides excellent service for the primary HCL process streams. Z-Core is made from a proprietary and highly chemical resistant thermoset compound and the 800 feet of pipe is ideal for a secondary service composed of a variety of corrosive chemicals, including methanol. The local distributor provided turnkey service involving shop fabricated spools and on-site installation.
